Write code and connections in wokwi for ultrasonic sensor. Whenever distance is less than 100 cms send "alert" to ibm cloud and display in device recent events.

SCHEMATIC/CIRCUIT DIAGRAM:

IBM CLOUD OUTPUT:

The screenshot shows the IBM Cloud IoT Platform interface. On the left is a dark sidebar with various icons. At the top, there's a navigation bar with 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue button labeled 'Add Device' with a plus icon is in the top right. Below the navigation bar, there's a tabbed interface with 'Identity', 'Device Information', 'Recent Events' (selected), 'State', and 'Logs'. A close button 'X' is in the top right of the 'Recent Events' tab. Below the tabs, a message states: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with the following data:

Event	Value	Format	Last Received
event_1	{\"distance\":7,\"Alert\":\"Distance less than 10\"}	json	a few seconds ago
event_1	{\"distance\":9,\"Alert\":\"Distance less than 10\"}	json	a few seconds ago
event_1	{\"distance\":8,\"Alert\":\"Distance less than 10\"}	json	a few seconds ago
event_1	{\"distance\":9,\"Alert\":\"Distance less than 10\"}	json	a few seconds ago
